RE: Letter of Justification

Pursuant to section 90.205 of the Federal Communications rules and regulations, Mobile Relay Associates (MRA) is providing justification for the proposed service area that is greater than the prescribed 32-kilometer radius.

MRA is requesting that it be allowed to expand its mobile area to 80 kilometers as indicated on form 601. The applicant plans to provide support for its communications business in Los Angeles Metropolitan Area, California and surrounding areas. By extending the service areas to cover both the downtown and fringe areas, MRA can operate from fewer locations. By limiting the number of locations, MRA can keep its operating costs manageable.

MRA respectfully requests that it be allowed to operate within 80 kilometers service area of the location indicated on Form 601.

Attached is a plot indicating the region of the 39dbu signal strength contour for MRA's proposed station along with the 50 mile radius from the station. The map clearly shows that the 39dbu contour does not exceed the 50 mile radius.
